

## Experiment-10

**Name:** Anuj Kumar Singh

**UID:** 23BCS10195

**Branch:** CSE

**Section/Group:** KRG\_1-B

**Semester:** 5th

**Date of Performance:** 04/11/2025

**Subject Name:** ADBMS

**Subject Code:** 23CSP-333

**1. Aim:** Perform CRUD Operations using No-SQL Database:MongoDB

### **2. Objective:**

- Create and manage databases and collections.
- Perform **CRUD operations** — Create, Read, Update, and Delete documents.
- Use **aggregation** for grouping and summarizing data.
- Understand how to modify, query, and manage collections efficiently in MongoDB.
- Gain practical experience with real-world data handling through command-line operations.

### **3. Code:**

```
// 1. Show all databases
show dbs

// 2. Create or switch to your database
use db_shivanshu

// 3. Check current database
db

// 4. Create a collection (optional)
db.createCollection("movies")

// 5. Insert Operations
db.movies.insertOne({
    title: "Inception",
    director: "Christopher Nolan",
    year: 2010,
    rating: 8.8,
```

## 5. Learning Outcomes:

- Understand the structure and working of MongoDB as a NoSQL database.
- Create and manage databases and collections using MongoDB commands.
- Perform CRUD (Create, Read, Update, Delete) operations on documents.
- Apply aggregation operations for data grouping and analysis.
- Gain practical skills in handling and modifying data using MongoDB shell.
